

My Family Tree

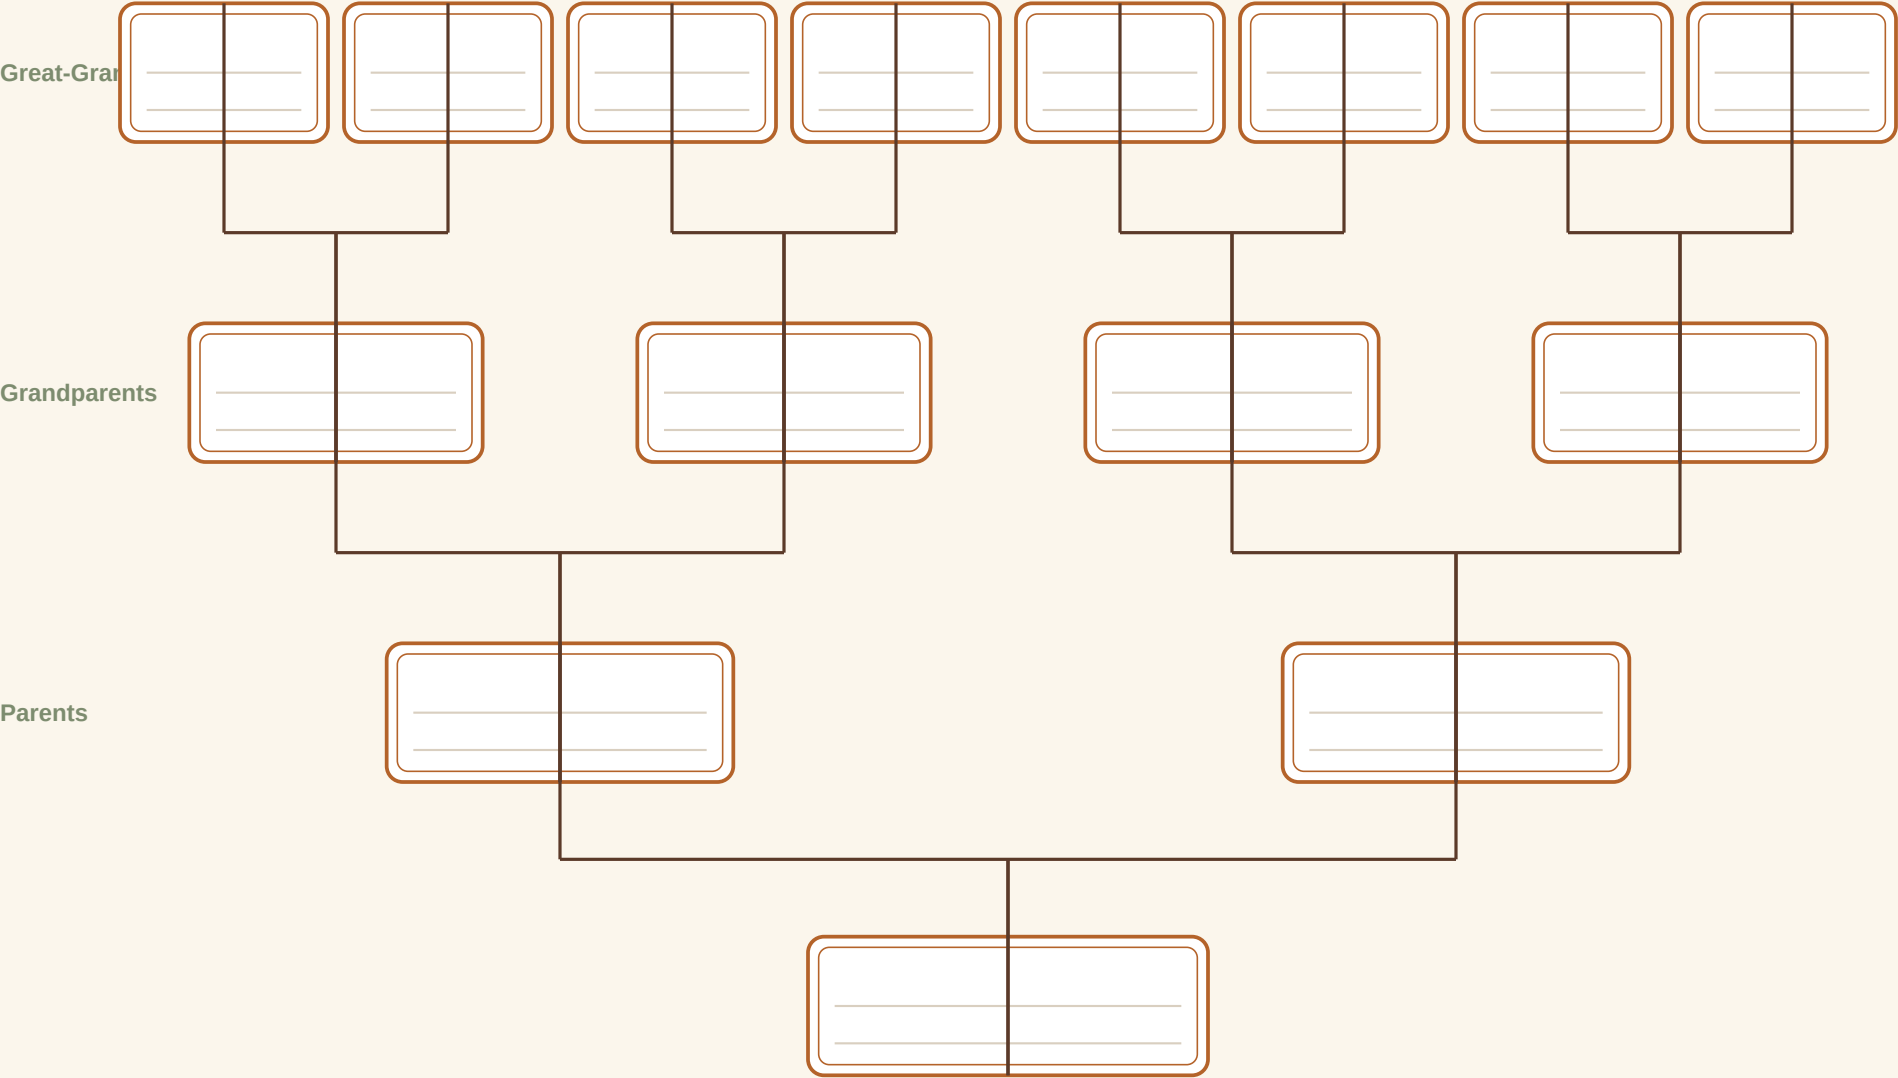

Write each person's name — and draw their picture in the box!

Tip: ask a grown-up to help you spell everyone's full name!

Our Family Tree

Four generations of the people who made us who we are

Pedigree Chart

Prepared by: _____

Date: _____

The pedigree chart is a hierarchical diagram showing four generations of a family. It consists of the following structure:

- Generation I:** A single horizontal row of 16 boxes, each divided into two columns (male and female) with three horizontal lines for text.
- Generation II:** A horizontal row of 8 boxes, each connected to a pair of boxes in Generation I by a vertical line. Each box is divided into two columns with three horizontal lines.
- Generation III:** A horizontal row of 4 boxes, each connected to a pair of boxes in Generation II by a vertical line. Each box is divided into two columns with three horizontal lines.
- Generation IV:** A single box at the bottom, connected to a pair of boxes in Generation III by a vertical line. The box is divided into two columns with three horizontal lines.

Connections between generations are made using vertical lines from the center of the boxes in one generation to the center of the boxes in the next generation, with horizontal lines branching out to connect to the next level.
